

GUNTA PRASHANTH KUMAR

SOFTWARE ENGINEER

Portfolio: <https://prashanthkumar.pythonanywhere.com>

Linked in: <https://www.linkedin.com/in/prashanthkumar-gunta-345397258/>

Objective

Software Engineer with 1+ year of experience in Machine Learning, Django, and React.js. Built and deployed ML models, integrated them into web apps, and developed responsive UIs.

Skills

- Python, JavaScript
- Django, Django Rest Framework
- React.JS, Flask
- HTML- 5, CSS-3
- MySQL
- GIT & GIT-HUB
- Pandas, Numpy
- Scikit-Learn, Matplotlib
- Seaborne & Tensorflow

Experience

SAK INFORMATICS DEVELOPERS/SOFTWARE ENGINEER

2023-PRESENT

- Developed and maintained web applications using Python frameworks like Django, Django rest framework and Flask.
- Collaborated with cross-functional teams to define, design and ship new features
- Utilized front-end technologies such as HTML, CSS, JavaScript, and frameworks React.js
- Implemented user authentication and authorization
- Used version control systems like Git for collaborative development and code review.
- Developed ML Models and Trained for Various predictions and Integrated into the Django & Flask Web applications

Education

MALLA REDDY COLLEGE OF ENGINEERING AND MANAGEMENT SCIENCE /JNTUH

2020-2023

- Branch – Mechanical
- GPA - 6.51

V.M.R POLYTECHNIC / SBTET

2017-2020

- Branch – Mechanical
- Percentage -75%

ST. JOSEPH'S E/M HIGH SCHOOL/SSC

-2017

- GPA – 7.8

Projects

COMBINATION OF VACCUM CLEANER & AIR BLOWER

DIPLOMA

- The purpose of this project is to design and create a floor and road cleaning machine for colleges, hospitals, auditoriums, and workshops. A "low-cost high-power sweeper with lattice blades" was created and developed as a new way of implementing street cleaning on streets and university floors.

HEXACOPTER INTEGRATED WITH LIDAR SENSOR

B.TECH

- Innovative aerospace engineer with a passion for UAV technology and a focus on hexacopter design and analysis. Experienced in conceptualizing, designing, and optimizing hexacopter configurations for various applications including aerial photography, surveillance, and payload transport.
- Light Detection and Ranging (LiDAR)sensors use light energy, emitted from a leaser, to scan the ground and measure variable distances. The result is a rich set of elevation data that can be used to produce high-resolution maps and 3D models of natural and man-made objects.

E-COMMERCE WEBAPPLICATION - DJANGO

HANDS-ON-EX.

- Designed and developed a robust e-commerce platform from scratch using Django framework. Implemented core features including user authentication, product catalog management, shopping cart functionality, and secure checkout process. Integrated a secure payment gateway Razorpay to ensure secure and efficient transactions, meeting industry standards.
- Source Code: <https://github.com/Prashanthkumar8466>

TRAVEL EXPENSES PROJECT - DJANGO

HANDS-ON-EX.

- Developed an Expense Management System using Django to help users manage trips, expenses, and categories. This project includes user authentication, trip and expense tracking, category management, and PDF generation for expense reports. The system features account activation and reactivation via email, and provides a comprehensive interface for managing personal finances related to travel.
